Leave blank

3. The curve C, with pole O, has polar equation

$$r = 1 + \cos\theta, \quad 0 \leqslant \theta \leqslant \frac{\pi}{2}$$

At the point A on C, the tangent to C is parallel to the initial line.

(a) Find the polar coordinates of A.

(4)

(b) Find the finite area enclosed by the initial line, the line OA and the curve C, giving your answer in the form $a\pi + b\sqrt{3}$, where a and b are rational constants to be found.
