Leave blank

7. The line l_1 has equation

$$\frac{x-3}{4} = \frac{y-5}{-2} = \frac{z-4}{7}$$

The plane Π has equation

$$2x + 4y - z = 1$$

The line l_1 intersects the plane Π at the point P

(a) Determine the coordinates of P

(3)

The acute angle between l_1 and Π is θ degrees.

(b) Determine, to one decimal place, the value of θ

(3)

The line l_2 lies in Π and passes through P

Given that the acute angle between l_1 and l_2 is also θ degrees,

(c) determine a vector equation for l_2

(5)
